10 th	D. R. Kanya Shala, Amalner, Jalgaon.		2010	90.18%

PROFESSIONAL EXPERIENCE

May'17–till date

Software Developer, Verdantis Technologies Pvt. Ltd, Mumbai.

Product: **Ultria** - Contract LifeCycle Management

Ultria, a CLM web-application facilitating contract lifecycle from drafting to utilization to expiration and compliance. It includes several essential steps of contracting as Request, authoring, approve, negotiate, sign, capture and comply.

I got to work on different modules as 'Request portal'; which was further integrated with 'Salesforce', 'Workflow' (for reviewing the contracts at several stages), 'Negotiation' 'Signing', etc.

My responsibilities include:

- Developing solutions by studying client requirements / project key features
- Write well designed, testable, efficient code.
- Designing Restfull API services compatible for various platforms as backend for mobile APK as well as web application.
- Upgrading the versions of technologies used timely (eg. Spring, hibernate upgrades).
- Analysis and implementation plan for reducing the number of calls made to the database.
- Documentation and collaborative problem solving with multiple teams.

OTHER PROJECTS

Project 1:

Title: Stationary Needs (E-commerce Website).

Duration: 2 months {Individual Project}

Technology: Java, SQL, HTML, JavaScript, CSS, Bootstrap.

Frame Work: Spring MVC, Hibernate, Angular JS

Description: A demo purpose E-commerce Website for stationary products; categorized in school, college and office needs. Its incorporated with essential functionalities for customer and admin with email acknowledgments at required points. It is facilitated with hibernate validations, spring security at backend, web-flow for checkout functionality, angular JS and bootstrap at frontend. It uses Apache Tomcat server and H2 database. In this only admin has authority to add, edit or delete any product and supplier.
